Thursday, Period 4-5, TUR 2319

COURSE DESCRIPTION

The literature on globalization has few pages devoted to Africa which is seen largely as a marginal continent in the overall process of the world progressive integration. Even in the few cases where Africa is mentioned in the debates about globalization, it is often presented as a victim rather than an actor of global processes. This course is designed to uncover the different ways in which Africa and Africans are engaged in the global exchanges of goods, ideas, people, and moneys that make them actors in the global arena. The course will explore the life of Africans abroad and the different ways in which African immigrants in Western contexts engage in activities cutting across national boundaries and connecting their home communities to global cities. Through a combination of Essays, Ethnographies, journal articles, and films the course will examine the place and role of Africa and Africans in the worldwide global connections. We will explore in the course the following foci:

- Africa’s place in the global world economic order
- African youth and their participation in global culture
- Economic underdevelopment and the performance of modernity
- The Mobile phone revolution in Africa: At home in the World
- African Trade Networks
- African Migrants and their Transnational practices: Communication and Remittances

OBJECTIVES

The main objectives of this course are:

- To expose students to anthropological perspective in the representation of Africa and African societies and cultures by examining the wider historical processes that has set the stage for the transformation of the anthropological views on the African object/subject.
- To help students cultivate a greater command over current trends in social analysis and theorization about modernity, postcolonial subject, and the changing perspective on African realities.
- To enhance students’ critical thinking and analytical writing skills.
